- descriptive statistics for rating columns

- The average rating of the Harry Potter books is: 4.489176670023024

 a bar plot visualizes the average ratings of the Harry Potter books, along with a horizontal line representing the weighted average rating for the entire series. This visualization provides a clear comparison of the individual book ratings to the overall average rating.

And a horizontal line is added to the plot to represent the weighted average rating calculated earlier. This line helps to visually compare the average ratings of individual books to the overall weighted average rating for the entire series.

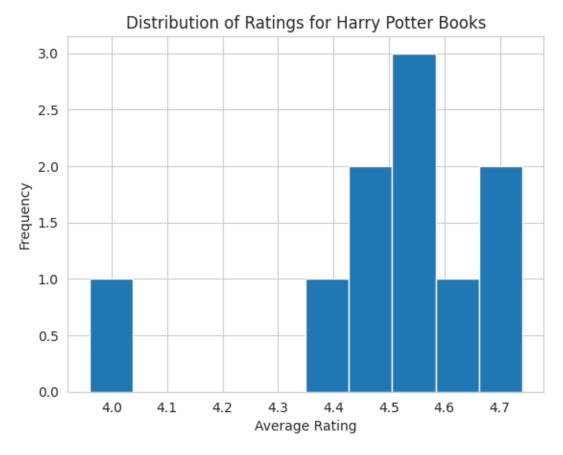

bar plot that compares

the ratings count for each book in the Harry Potter series and shows that Harry potter and the sorcerer's Stone has the highest rating count

- Each representing the average rating of a Harry Potter book corresponding to its publication year. The plot demonstrates fluctuations in the average ratings over the years, indicating how the average rating has changed for each book over time. starts with a high average rating above 4.5 in 1998, then there is a significant increase to nearly 4.7 in 1999, then the rating slightly drops below 4.5 in 2000, then a sharp decline is observed in 2001, bringing the average rating down to around 4.2. In 2002, there is a sharp increase back to just below 4.7, then the rating slightly decreases in 2003, remaining above 4.5.

The final data point in 2004 shows a small increase, ending just below 4.6.
